Runner

Bring each candidate from the waiting area to their room, and back again if needed

RMD Birmingham
Assessment night

Not here	Arrived	Collected	Being assessed	Assessed
On the list, not checked in	Checked in, waiting for runner	Runner has them, going to room	Assessor has taken them on	Result saved

ON THE NIGHT

1. Come to pre-exam teaching (usually the Wolfson Common Room, check each night). You have 1 or 2 allocated rooms.
2. On your phone open the Phase 1 hub: **Assessment night**, then **Runner / instructor**. Tap your room to open it.
3. Each row shows slot time, name, attempt number (1 to 4) and state. Only people showing **Arrived** have been checked in.
4. Call out your **room name** and the **student's name** (the next unassessed name on your list, in slot order). When they come to you, tap **Collect** and walk them to the room.
5. The assessor takes them on, and you tap nothing. The row moves to **Assessed** when the result is saved.
6. Where they go next depends on the result. The assessor tells you which pathway:
   - **Passed:** free to go home.
   - **Referred at a first sit:** the assessor sends them to the RMD Student Faculty hub in the atrium, who give them further details and directions. Nothing for you to do.
   - **Not passed at a second sit or later:** not retested tonight. Take them to RMD faculty, who explain the next steps.
7. Go back to pre-exam teaching and collect the next candidate.

IF SOMETHING GOES WRONG

Called, nobody comes
Tap **Not answering**. It counts your calls and flags them for faculty. If they turn up, tap **Clear**.

Collected the wrong person
Tap **Put back** while they still show Collected.

Someone says they were checked in but isn't showing Arrived
Send them to the check-in station.

Not on your list
Send them to RMD faculty.

Remember: a referred candidate starts attempt 2 back at **Not here**. Student Faculty at the atrium hub confirm the retest and pick a retest room. They then show as **Arrived** in that room, marked **Resit** instead of a time. Collect them and walk them there. You never pick the room.
